

# Join the Fun and turn your students into Published Authors!

## Wouldn't it be fun to help make every one of our students a published author?

My class is preparing to write and illustrate our very own hardcover book through a **FREE student publishing program**. I've already signed up to complete the project and don't want your class to miss out. Join me in motivating more students to love writing through this **award-winning, hands-on activity**. I chose the program because it:

- Works across a variety of curriculum and supports Common Core
- Promotes student and school pride
- Builds self confidence and creates a lasting memory
- Provides guaranteed smiles from both students and their families

### Share the Smiles!

The publishing kit makes it super easy - even the shipping and handling is free - and any grade or class can publish a book. We simply create the pages, send it to the company, and they send back the finished book. Parents will also have the option to purchase a copy, but are under no obligation. The more classrooms that participate, the more free books we earn for our school. Plus, we are eligible to win school grants!

If you want to participate contact me \_\_\_\_\_  
to order your free kit so we can get started right away!
